CURRENT PROJECT

BuddyUp | Github: BuddyUp| Status: Development | Link: TBA
- BuddyUP helps people find partners for all types of outdoor adventures.
- Allows users to create an account, build/edit a profile, and create/update/delete activities. Users can sign up for, like, or comment on activities.
- React, MySQL, Express, Javascript, HTML, CSS, Material UI, and Figma.

WORK EXPERIENCE

Software Developer: *Vert Solutions.*   **May 2022 - May 2023**
- Coded using JavaScript, HTML, and Sass. Used established patterns for easy maintainability and to reduce cognitive load.
- Met with clients, presented new features, and discussed ideas in order to ensure the software met their needs.
- Worked directly with other developers using pair programming, GitHub, and Trello to avoid conflicts and ensure each task was completed effectively.
- Participated in daily meetings to discuss goals, ideas, direction, and new coding topics and practices.

Web Developer: *Luxury Properties of Jackson Hole*   **March 2022 - May 2022**
- Used Wordpress and WP Engine to add updates and maintain the website.
- Worked directly with the Marketing team to ensure the website accurately reflected the company's products and services.

Web Developer: *Destination Connection*   **December 2021 - March 2022**
- Collaborated closely with the CEO to design the layout of the site using UX/UI practices to ensure the best possible user experience and usability.
- Developed site using Javascript, HTML and CSS. Deployed through GoDaddy and GitHub.
- Ran Lighthouse reports to ensure the best possible performance, accessibility, and SEO.
